## Make Your Home Cosy, Efficient, and Future-Ready

Free, Impartial Retrofit Advice for Homeowners in West Devon and the Tamar Valley

# Why Retrofit?

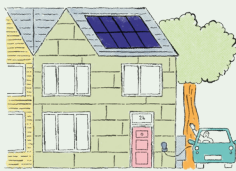

Retrofitting your home is about more than just saving energy. It's about creating a space that's comfortable, healthy, and kind to your wallet and the planet.

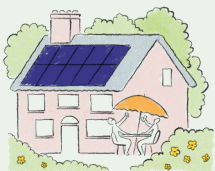

Cut energy bills: Lower your energy use and watch your bills shrink.

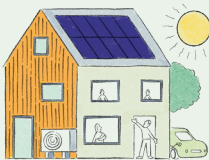

Boost comfort: Say goodbye to draughts, damp and cold spots. Enjoy a comfortable home all year round.

Future-proof your home: Adapt to changing environmental standards and live more sustainably.

Increase value: Energy-efficient homes are more attractive to buyers and renters.

Improve health: Better ventilation and temperature control mean a healthier living environment for you and your family.

## Meet our home retrofit specialists

**Confused about where to start with energy-efficient home improvements?**

**We're here to help!**

We're independent, not-for-profit and impartial, so you can trust our advice is in your best interest.

Our retrofit advisors all live locally and have years of experience in advising West Devon and Tamar Valley households.

### Step one:

Book your free home visit ... and meet your local retrofit advisor to understand your home's needs ...

### Step two:

Receive free, expert information provided for you on retrofit options, funding and grants.

### Step three:

Discuss next steps which may include a more detailed technical survey and plan as appropriate.

## In-depth technical guidance

For those considering major renovations or specific upgrades like heat pumps, or wanting a more detailed plan, we offer a comprehensive Whole House Energy Efficiency Report.

This paid-for, in-depth assessment and plan is carried out by our partners, award-winning Retrofit consultancy Dartmoor Energy. The assessment includes:

Detailed analysis of your entire property, including maintenance needs, energy demand, air quality, damp management, ventilation and heat loss

Tailored advice on high-impact, energy efficient measures, fit for the style and age of your home, your lifestyle and budget.

A plan to ensure improvements are carried out in the right order, with installations and refits that complement each other.

**Our expert advisors will help you chart the best course for your home's energy future.**
